House

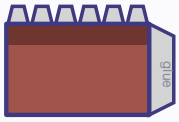

cut • fold • glue - box walls, prism roof and tube chimney

walls: box

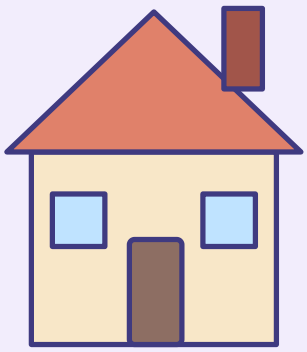

roof: triangular prism

chimney

Here's what you'll get:

height ≈ 12 cm

cut
fold
apply glue

paper 160-200 gsm
print at 100% scale
glue stick

1. Cut out all pieces along the solid lines. A grown-up helps with the small ones.
2. Glue the walls: fold along all dashed lines and glue the box using the tabs (the ceiling can stay off).
3. Roof: fold the strip into a triangular prism - two slopes and an attic floor - and glue the ends.
4. Put the roof on the box and glue it. Roll the chimney into a tube and glue it to the slope.
5. Color the windows and the door if you like.
