Lighthouse

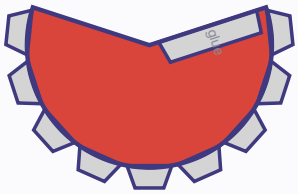

cut • fold • glue - tapered tower, tube lantern room and cone cap

tower (tapered cone)

lantern room

cone cap

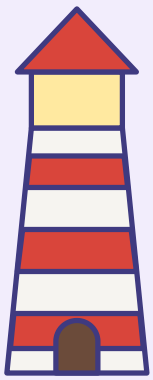

door

balcony (strip)

Here's what you'll get:

height ≈ 15 cm

cut	paper 160-200 gsm
fold	print at 100% scale
apply glue	glue stick

1. Cut out all pieces along the solid lines. A grown-up helps.
2. Roll the tower into a tapered cone and glue the side tab: the wide arc goes at the bottom. Roll the lantern room into a tube.
3. Fold the teeth at the top of the tower inward and glue them to the bottom edge of the lantern room.
4. Roll the cap into a cone and glue it on the lantern room with its teeth. Glue the door to the bottom of the tower.
5. Stand the lighthouse on a flat surface, wide end down.
